Axsun announces move to become a Publicly Traded Company on the Canadian Exchange

We are pleased to announce that the Axsun Group of Companies has entered into an agreement to become a publicly traded Company. Since our inception as Axsun Logistics Inc. in 2003, Axsun has become Canada's largest Cross border Intermodal Service Providers. Through subsequent years the addition of Axsun Transport & Distribution Inc. and Axsun Global Inc. has positioned Axsun to become one of Canada's important asset-based transportation service providers offering Intermodal, Highway, Cartage, Global Freight forwarding, Warehousing and Distribution services.

As we begin the process to becoming a publicly traded company we are also please to inform you that we will now be known as Axsun Inc. Our three operating divisions are now merged into one company. With the benefits of integrating SAP as our operating system we are now able to seamlessly integrate all companies and become one of the most technologically advanced transportation firms and truly living our "One Source, One Promise" commitment.

Today, Axsun Inc. employs approximately 75 people, maintains its own Intermodal Container fleet along with its own Tractor and Trailer fleet for highway services as well as its own warehousing facilities.

As we begin our 9th fiscal year, we look forward to joining the public markets as we embark on an aggressive new growth plan throughout North America.

We would personally like to thank our customers, suppliers and partners who have helped in making Axsun Inc. the company it is today and we look forward to

growing our relationship throughout. We also can never forget our employees who have contributed tremendously through their loyalty and dedication as we embark on the next journey of our Company's History.

For additional information please contact Steve Ramescu, President Axsun Inc.
